### Give your Ford the care it deserves-

and it will not "shake" and "chatter",

Would you let a high-priced car "jerk" and "jump" for lack of the right oil? Then why let your Ford protest without heeding the warning? Your Ford will stop "jerking" when you put "F"Autoline Oil in your crank case.

"F" Autoline Oil softens hard, glazed brake and transmission linings- and thus enables them to grip the "drums" evenly-avoiding "jerky" stopping, starting and reversing.

"F" Autoline is a motor-oil—a perfect all-season lubricant. It costs no more than ordinary oil. It

won't clog the oil line. Money Back if Your Car "Chatters"

Go to your dealer or garageman and ask him to drain the old oil out of your crank case and fill it with "F" Autoline Oil for Fords. If your Ford "chatters" after that, go back and get your money.

We have been solving lubrication problems for 90 years. We are the makers of the famous "OO" Autoline, one of the few oils recommended in the Franklin Owners' handbook, for use in Franklin Cars.

What a Dealer Said:

"Accept our compliments for being the producers of such a quality product.... machines now running as they did when new".

Go to the garage that displays the red Autoline Oil sign-and let your Ford have the chance of riding smoothly.

# Chats With Your Gas Man

If you are using defective gas tubing, discard it. Do not mend it.

It is criminal carelessness to try to keep in use gas tubing that will permit even an infinitesimal amount of gas to escape, by patching it with tire tape, putty, rags, soap, or bread dough, as has been shown upon investigation to have been done in mapy instances.

Worn-out gas tubing should be replaced by purchasing only the best grade of tubing. It may cost a few cents mere, but it is worth it.

Ask for and insist upon having only the highest grade, for such tubing is absolutely odorless and will last longer than the inferior articles which are sold for a cent or two less per foot than the su-
